This Basic Orton-Gillingham (O-G) training course designed by Ron Yoshimoto teaches teachers how to use the foundational O-G strategies in using multisensory structured language (MSL) to teach reading, writing and spelling in whole classroom, small intervention group and one-to-one instructional settings. The course will cover three levels of decoding and spelling: sound-symbol (phonology or phonics), syllable (orthography), and beginning morphological or semantic. Participants will receive numerous materials to assist them in the implementation of the Yoshimoto O-G Approach including a CD with over 6,000 worksheets dealing with syllabication, sounds, rules and generalizations, handwriting and lesson planning. All materials are copyrighted and are provided for the sole use of the participant. Course materials may not be used to train others and may not be shared with teachers who have not taken Ron Yoshimoto's OGI Basic O-G Course.

For whom is the O-G approach appropriate?

The O-G approach is appropriate for teaching reading, writing, and spelling to individuals, small groups, and whole classrooms. This class is designed for teachers and those who support them including: reading teachers, intervention specialists, kindergarten & elementary school classroom teachers, SLPs, administrators and teacher trainers.

Multisensory:

O.G. teaching sessions are action oriented with auditory, visual, and kinesthetic elements reinforcing each other; spelling is simultaneously taught with reading.

Structured, Sequential, Cumulative:

Teaching proceeds from phonemic awareness to phonics, syllable types, syllable division rules, spelling, vocabulary, morphology, comprehension, sentence structure & composition.

Cognitive:

Learning is cognitively based, using students' strengths, while accommodating their weaknesses.

Flexible:

At best, O.G. teaching is diagnostic-prescriptive. The teacher always seeks to understand how an individual learns and devises appropriate teaching strategies.
