This Yoshimoto Orton-Gillingham (O-G) Basic Extension and Advanced (morphology) training course will focus on teaching morphologic skills but will also extend and integrate your teaching skills in Basic OG Literacy. The course will review the first two levels of decoding and spelling: sound-symbol (phonology or phonics) and syllable (orthography) and then focus on the morphological or semantic level of language. This course is designed solely for those who have taken the Yoshimoto OG Basic Literacy Course and have implemented OG in their classrooms. Initial discussion will center on questions from classroom implementation. Simulations of OG Basic and Advanced lessons will be an integral part of this course. Participants are asked to bring: scope & sequence, basic card deck, blank lesson plans, pair of scissors, small mirror and permanent marker.

For whom is the O-G approach appropriate?

The O-G approach is appropriate for teaching reading, writing, and spelling to individuals, small groups, and whole classrooms. This class is designed for teachers and those who support them including: reading teachers, intervention specialists, kindergarten & elementary school classroom teachers, SLPs, administrators and teacher trainers.

Multisensory:

O.G. teaching sessions are action oriented with auditory, visual, and kinesthetic elements reinforcing each other; spelling is simultaneously taught with reading.

Structured, Sequential, Cumulative:

Teaching proceeds from phonemic awareness to phonics, syllable types, syllable division rules, spelling, vocabulary, morphology, comprehension, sentence structure & composition.

Cognitive:

Learning is cognitively based, using students' strengths, while accommodating their weaknesses.

Flexible:

At best, O.G. teaching is diagnostic-prescriptive. The teacher always seeks to understand how an individual learns and devises appropriate teaching strategies.
